

To whom it may concern:

As part of our continuing effort to provide the most modern and industry relevant technical training, our organization has recently added CompTIA. As such, we currently have no data to provide job placement statistics for the current iteration of the program.

Depending on student demand and cohort availability, our plan is to begin holding courses for this program Q2 of 2021. As each cohort graduates and moves on to take the certification exams, we will collect pass/fail data and generate appropriate statistics and projections. A report with this data will be generated annually and provided as requested.

If you have any further questions regarding our process or data availability, please feel free to reach out to our offices.

Respectfully,

Zack Zakhem

Dean of Instruction
