

To whom it may concern:

As part of our continuing effort to provide the most modern and industry-relevant technical training, our organization has recently added CompTIA. As such, we currently have no data to provide job placement statistics for the current iteration of the program.

Depending on student demand and cohort availability, our plan is to begin holding courses with this Quarter 2 of 2021. As each cohort graduates and moves on with their careers, we will collect employment data and generate appropriate statistics and analysis. A report with this information will be generated annually at the completion of each session, updated as new placement information becomes available, and provided as required.

If you have any further questions regarding our process or data availability, please feel free to reach out to our offices.

Respectfully,

Zack Zakhem

Dean of Instruction
